Medicare Chronic Care Program Overview

Medicare's chronic care management services are personalized and supportive services provided to patients with chronic conditions to achieve health goals.

- Chronic Care Management (CCM) services support individuals with multiple chronic conditions.
- Complex Chronic Care Management (CCCM) services support individuals with multiple chronic conditions who require moderate or high medical decision-making.
- Principal Care Management (PCM) services support individuals with a single complex chronic condition.

CCM, CCCM, and PCM services are grouped in with the suite of care management services billable by FQHCs via G0511 1 ([see NACHC resource: Summary of Medicare Care Management Services Billed Using G0511](#)). This Tip Sheet provides FQHCs with simplified, easy-to-understand instructions for providing and billing Medicare for CCM, CCCM, and PCM services.

athenaOne Care Team Roles

	athenaOne Role	Who they Are	athenaOne Functionality	CMS Service Provider Role
	Provider	• Physicians (MD, DO) • Nurse Practitioner (NP) • Physician Assistant (PA) • Certified Nurse Midwife (CNM)	Provide initiating visit and general supervision of care management activity.	Authorized Billing Providers
	Care Manager	• Licensed healthcare professional • Nurses (nurse care manager, clinical nurse specialists (CNS), RN, LPN) • Social Worker	Manage all clinical aspects of a patient's care plan under the general supervision of an authorized billing provider. Updates care plan.	Auxiliary Personnel
	Care Coordinator	Non-licensed or credentialed staff	Responsible for updating demographics, scheduling appointments, following up by phone, and basic care planning. Cannot update the care plan.	
	Care Giver	Family members, friends, nurses, or other individuals involved in the patient's care.		

athenaOne CCM/PCM High-Level Care Plan Workflow

- Identify patients eligible for the Medicare CCM/CCCM/PCM program using risk stratification.
- Communicate the benefits and cost of the Medicare CCM/CCCM/PCM program with the patient during an initiating face-to-face visit (e.g., during an E/M visit, Annual Wellness Visit (AWV), or an Initial Preventive Physical Exam (IPPE)).
- Enroll eligible patients into the CCM/PCM Program.
- Jointly create or update the comprehensive Care Plan with the patient.
- Document and track time spent on care management and care coordination using the Care Management Event in the Care Plan.
- The provider reviews the Care Plan Audit at the end of the month.
- Submit claims for patients who have met the monthly CCM/PCM criteria.
- Repeat steps 5 through 8 monthly until the patient graduates or opts to disenroll from the program.

athenaOne CCM/PCM Configuration

The configuration listed below is for organizations using the athenaOne **CCM/PCM Care Plan Workflow** for organizations without the Population Health module. This configuration does not include items for the alternative CCM/PCM Encounter Workflow that documents the care plan in History Present Illness (HPI) instead of in the care plan.

Medicare Chronic Care Management Consent

Enable the **Medicare Chronic Care Management Consent** Practice Setting to access the workflow functionality in the patient's chart. Your Athena Customer Support Manager (CSM) can verify if you have this setting turned on. Once this is turned on, you will have access to the following reports in the report library.

- Chronic Care Management Eligible Patients Report
- Medicare Chronic Care Management Claims Eligible to be Created Report
- Care Plan Report

Configure Practice Roles

Create Practice Roles (e.g., "ccmreview", "ccmbilling", "providerreview"). These roles are practice-specific and are created to group staff members with similar or the same job functions for routing tasks in the INBOX. Creating multiple roles is not required. Practices can assign only one person for their CCM/PCM Program.

Settings>Admin>Clinicals>Practice Links>Practice Roles

- Enter "Role Name" (caremanagement)
- Select "Users" (that will provide CCM/PCM services)
- Click "All Departments"
- Click "Save"

Create the Care Plan Letter

Navigate to the  icon > **ADMIN > Clinicals. Select Clinical Paper Forms from PRACTICE LINKS > Forms and Letters.**

- Click "Add Forms"
- Complete the following fields as indicated in the athena documentation:
 - o Name: Care Plan Letter
 - o Department: Select "All"
 - o Type of paper form: Select "HTML barcoded or non-barcoded"
 - o Make form a letter template: "Check" the box
 - o Form required: Select "Encounter"
 - o Incoming status: Select "Review"
 - o Paper form body: Use the HTML code from [Add New Care Plan Letter \(athenahealth.com\)](https://athenahealth.com).
- Click "Add"

See the athenahealth documentation [New Care Plan Letter Available \(athenahealth.com\)](https://athenahealth.com) for more information or contact support for assistance.

Add CCM/PCM codes to your fee schedule

Refer to the [Summary of Medicare Care Management Services](#) (March 2024) published by the National Association of Community Health Centers (NACHC) for codes billed to CMS by FQHCs. Check [here](#) for the latest CMS payment schedules.

Care Management Services	FQHC Provider Codes (billing maps to CPT codes)	What FQHC bills to CMS
Chronic Care Management (CCM)	99490 (First 20 mins, non-complex ; clinical staff)	G0511
	+99439 (each add'l 20 mins; clinical staff. Only added to non-complex /99490)	
	99491 (30 mins; physician or QHP only)	
	+99437 (each add'l 30 mins; physician or QHP. Only added to non-complex 99491)	
Complex Care Management (CCCM)	99487 (60+ mins, complex ; clinical staff)	G0511
	+99489 (each add'l 30 mins; clinical staff. Only added to complex /99487)	
Principal Care Management (PCM)	CPT: 99424 (30 mins, physician or QHP, single high-risk disease)	G0511
	CPT: +99425 (each add'l 30 min; physician or QHP)	
	CPT: 99426 (30 mins, clinical staff directed by physician or QHP, single high-risk disease)	
	CPT: +99427 (each add'l 30 mins; clinical staff directed by physician or QHP)

Optional: Capture the patient's written consent using an athena consent form from the **Patient Actions Bar** by clicking on the "Clinicals" dropdown, and selecting "Print Forms". Search for "Chronic Care Management Consent Form". Print the form and upload the completed patient consent form to the patient's chart.

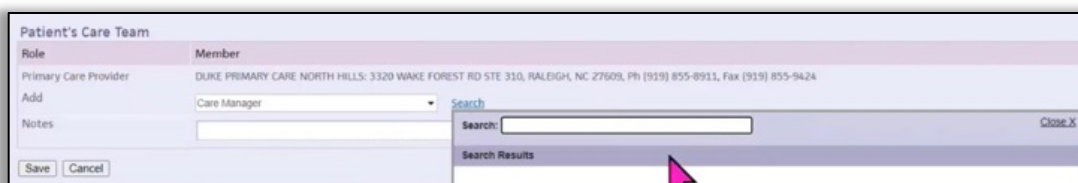

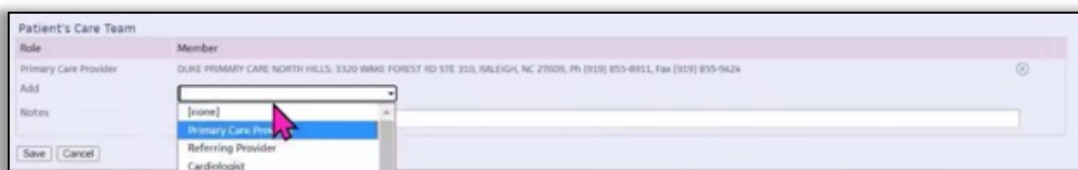

Add the Care Manager to the Patient's Care Team

From the patient's Quickview, scroll down to the **Identification/Provider section** and click on "Show Care Team Members".

Click "Add" and select "Care Manager" from the drop-down menu and click "Search" to add the appropriate clinical staff member; then click the "Save" button.

The patient's **Care Team Member** window shows the Care Manager. Repeat the steps to add additional care team members.

Manage Care Management Patients

- Care Managers

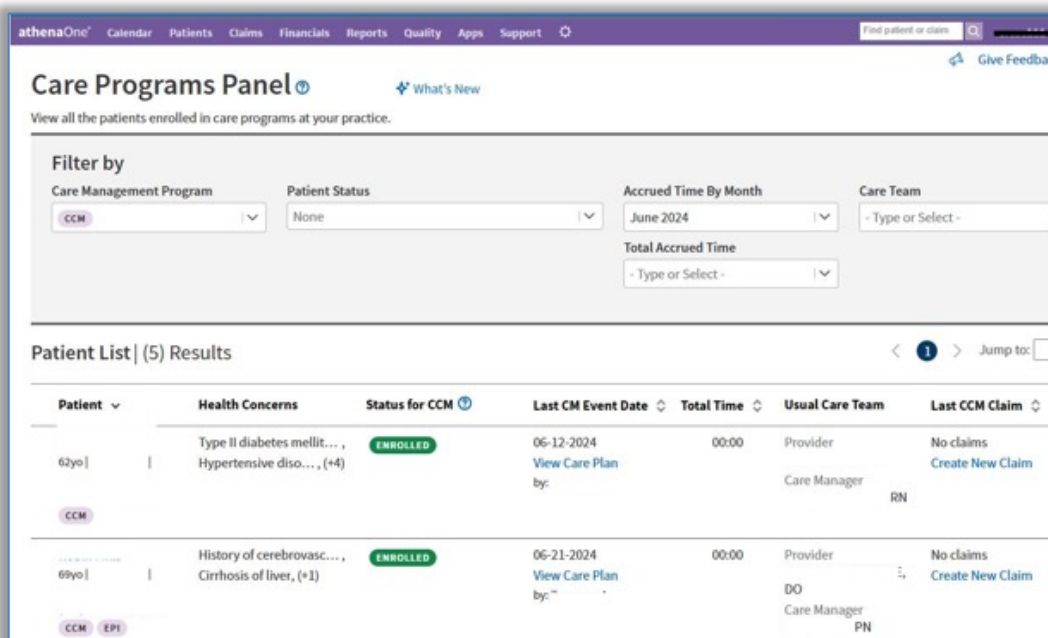

How Often?

- Daily as needed

Care Plan Overview

The athenaOne Care Plan provides centralized documentation for Care Management, including health risk assessments/screenings, a comprehensive care plan, goal setting, behavior modification, and next steps for the Care Team. athenaOne allows one active care plan per patient. New Care Plans are displayed in the **Active Care Plan** tab. Care Plans that have been met can be Archived and viewed in the **Historical** tab.

The Care Plan consists of five sections:

Care Management Events – allows summary documentation for each care management activity. The Care Management Event is not shared in the care plan document.

Health Concerns – allows users to document health concerns or reason(s) for the care plan. More than one reason or diagnosis can be added.

Goals – allows the practice to identify measurable treatment goals for care management.

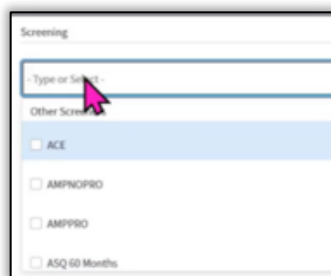

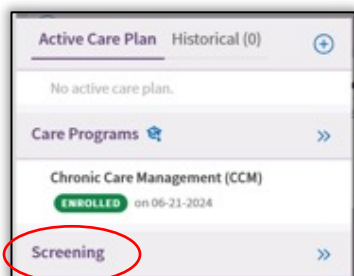

Patient Tasks – allows the practice to provide behavior modification opportunities based on jointly identified goals.

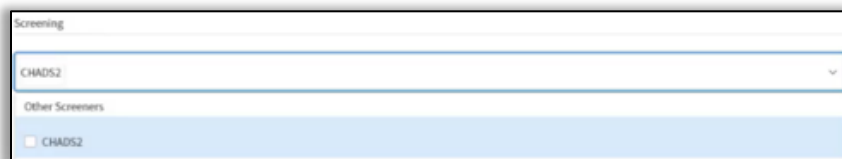

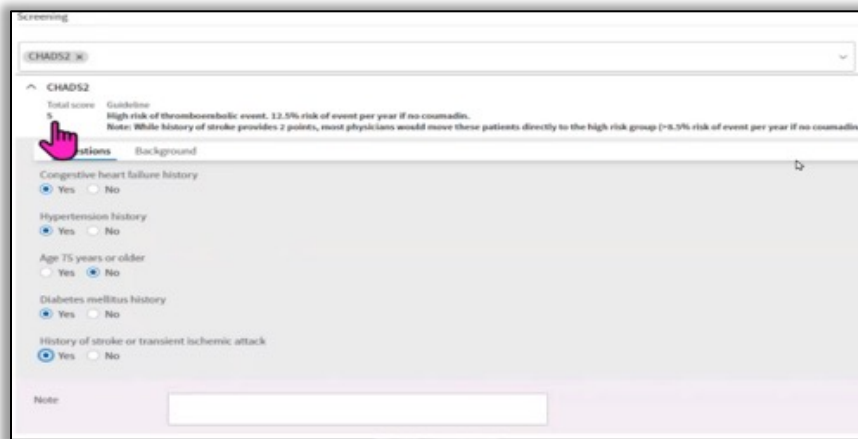

Care Team Tasks – allows the practice to document care team actions needed to close care gaps and support patient care.

Complete Screenings

Complete any relevant screenings to track trends over time based on the score. These screenings can also be viewed in the **Vitals** section of the chart under **Screening**.

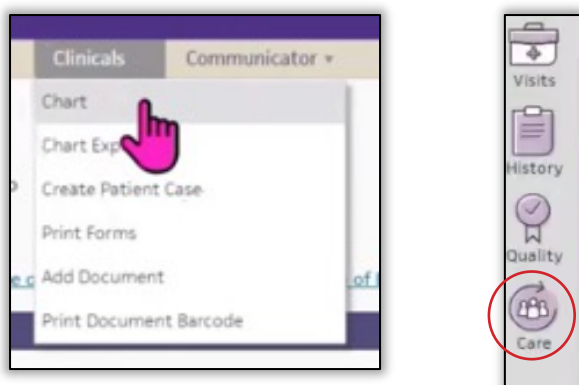

From the **Care Plan tab**, click on the “Screening double chevron >> icon”. Select or search by the screening name.

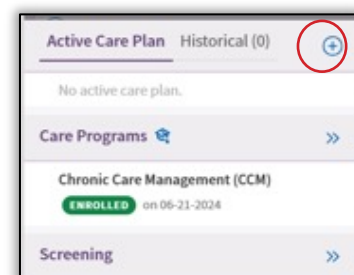

Create or Update the Comprehensive Care Plan

Go to the **Clinicals** tab from Quickview and select "Chart". On the left menu select the "Care icon".

The **Chronic Care Management Program** will be displayed in the Care Plan tab since the patient was enrolled through the patient's Quickview.

Click on the "+" icon" on the **Care Plan tab** to create a new **Active Care Plan**. Only one care plan can be active at a time. Use the trash can and select "Archive" to move completed care plans to the history section or select "Delete" if it was created in error.

Add Care Management Event(s)

Click on the "Care Plan chevron » icon" to open the Care Plan.

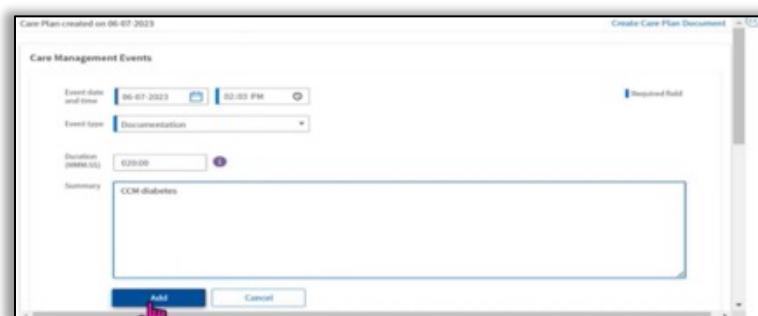

Click on the "⊕ icon" in the **Care Plan Events section** to add a new event. The Event Date and Time defaults to the current date/time and can be modified.

Select the "Event type" (modality) and enter the "Duration". The duration field allows you to manually enter the time spent for the event and is not a timer. The duration time is used in the **Care Plan Report** to keep track of the total time spent during the current month and the previous month.

Enter a summary of the care session in the "Summary field". As a best practice, document the program and diagnosis supported by the event in the summary.

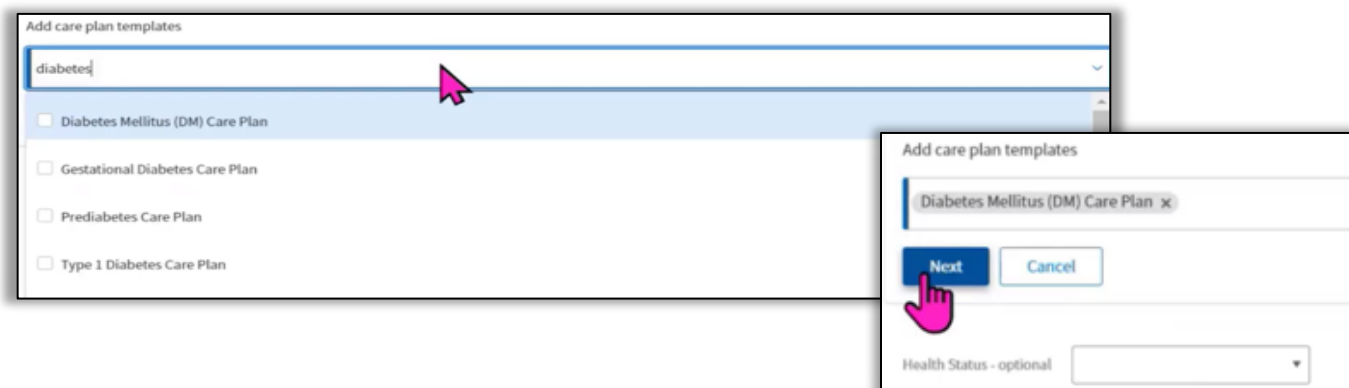

Click "Add" to create the event.

Note: Events can be edited and deleted using the  icon on the right

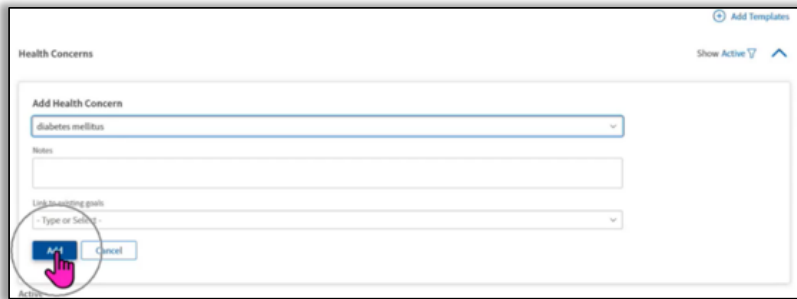

Add the Health Concern (reason for The Care Plan)

Add the Health Concern(s) using an athenaOne Care Plan Template by clicking "Add Template". Select the "care plan template" from the dropdown and click "Next". The template will pull in Goals, Patient Tasks, and Care Team Tasks based on relevant medical information. **Add all Health Concerns** included in the care plan.

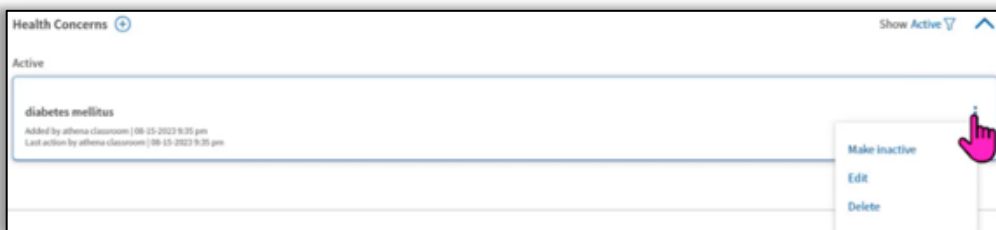

Without a template (Alternative)

Click on the “+” icon. Select the reason or diagnosis from the Add “Health Concern” from the dropdown menu. Enter any notes and link to existing goals as appropriate, then click “Add”.

You can Edit, Delete, or make the reason Inactive.

Adding Goals from Athena Template

Select goals as needed to reflect the patient’s individualized care plan.

Click “Finish” after adding goals from the template.

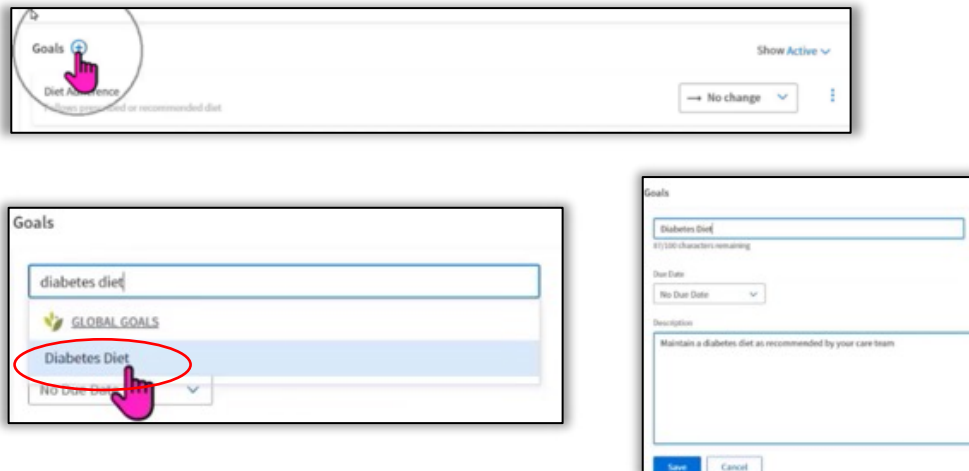

Care Plan Goals are added to the care plan

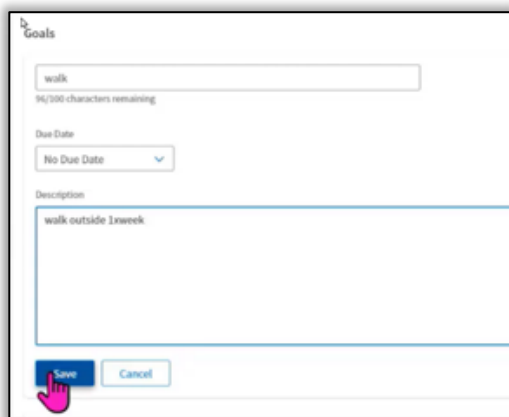

Adding Athena Global Goals Manually

Goals can be added manually to the Care Plan by clicking on the “+” icon next to the **Goals**. These goals are part of the Athena Global Goals (curated list) with the 🌱 icon.

Select the goal, enter the due date (optional), add a description, and click “Save”.

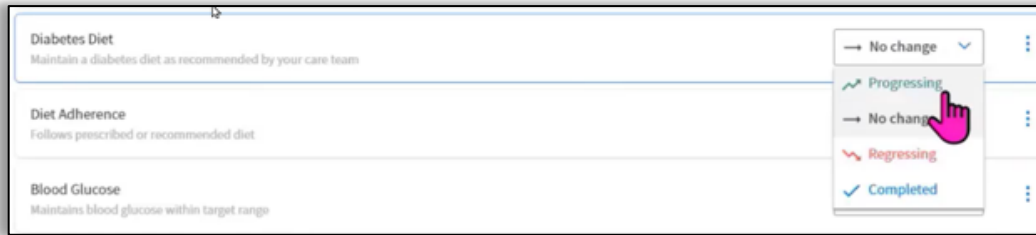

Adding Custom Goals Manually: Goals that are not part of the Athena curated lists 🌱, can be added by clicking, “add +” next to the **Goal**. Type text for the custom goal (e.g., “walk”, add a due date if applicable, and description of the goal), and click “Save”.

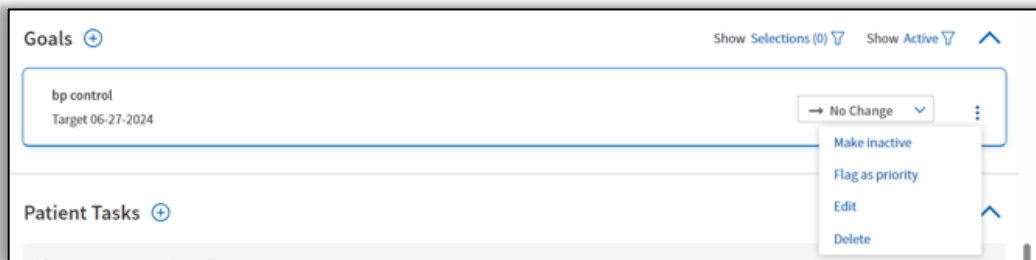

Note: Custom goals are user-specific and will only appear for the user who created the goals (will not display for other users) and will be available when adding goals to other patients.

Document the patients' progress on specific goals using the **Progress dropdown**.

Use the three vertical dots on the right to make the goal "inactive", "flag it as a priority", "edit" (to add a new narrative), or "delete" it as appropriate.

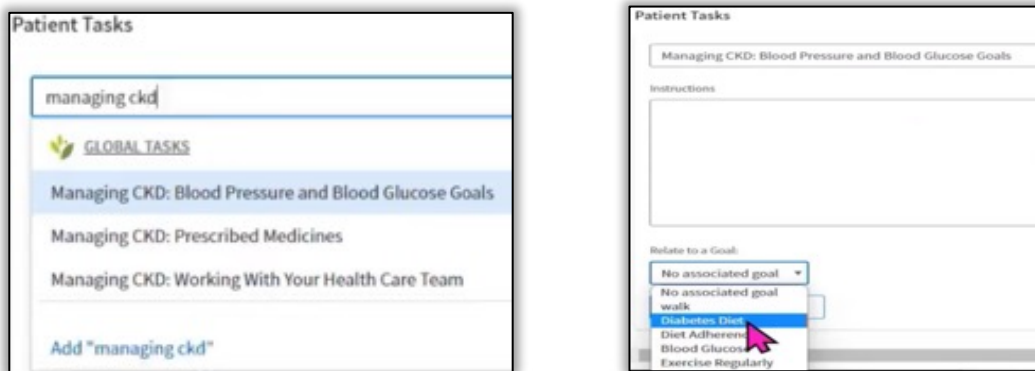

Note: No part of the care plan transfers to an Encounter including the goals section.

Add Patient Tasks

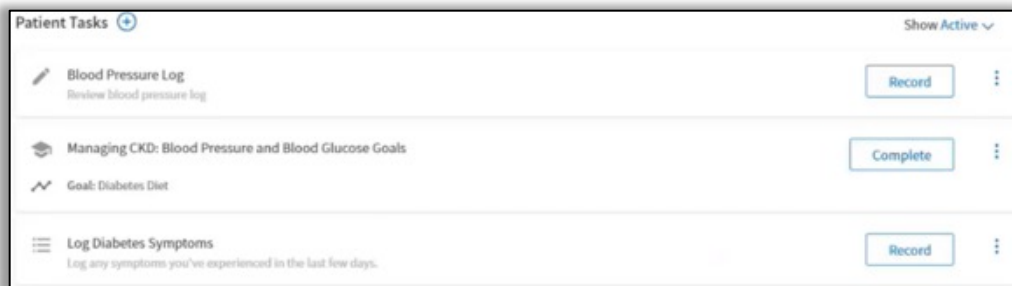

Tasks are created based on the Athena Template, or by adding custom tasks by clicking the "+" icon.

Patient tasks can be added from the **Athena Global Tasks**. These tasks can be associated with the **Goals** they relate to. Click "Add" to add the task.

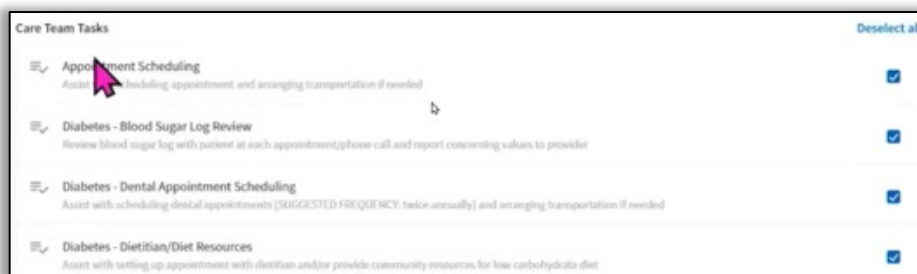

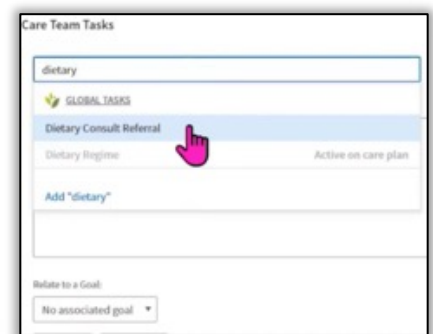

Custom Patient Tasks can be added manually by clicking the "+" icon". Tasks can be "Completed" or "Recorded" based on the task being added.

Add Care Team Tasks

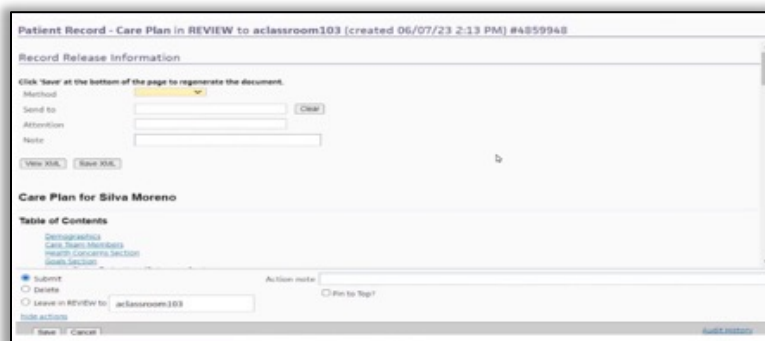

Select "Care Team Tasks" needed to close care gaps and support patient care.

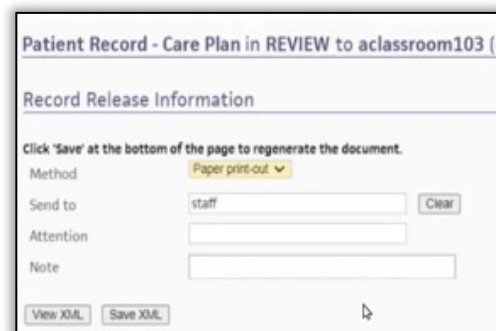

Add **additional tasks** from the Athena Global Tasks list OR a Custom task.

Notify Care Team Members or Providers of Tasks to Complete

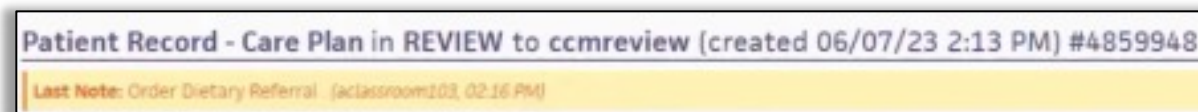

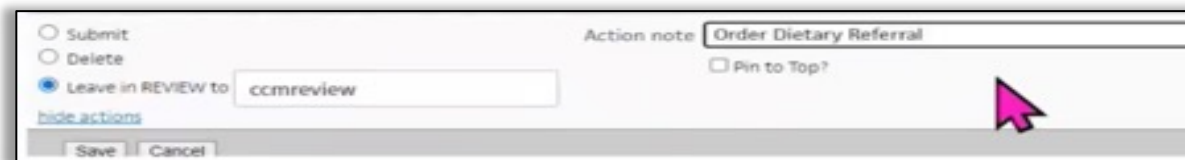

Alert care team members of tasks they need to complete by sending the Care Plan Document to them in **Review status**. Scroll to the top of the **Care Plan** and click “Create Care Plan Document”.

Select the “Record Release Information” Method as “Paper print-out”. Enter “staff” in the **Send to** box (for audit purposes).

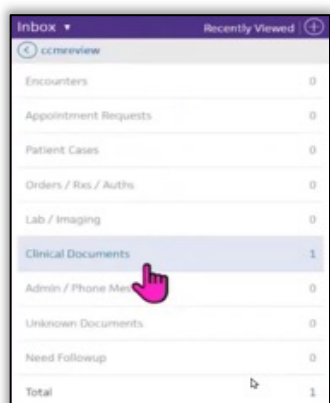

In the **Action Menu**, select “Leave in REVIEW to” to the assigned practice role or specific staff person. Complete the Action Note indicating the task the user needs to complete (e.g., order referral, etc.). Click “Save”. The task will show up in the assigned practice role’s or staff member’s INBOX.

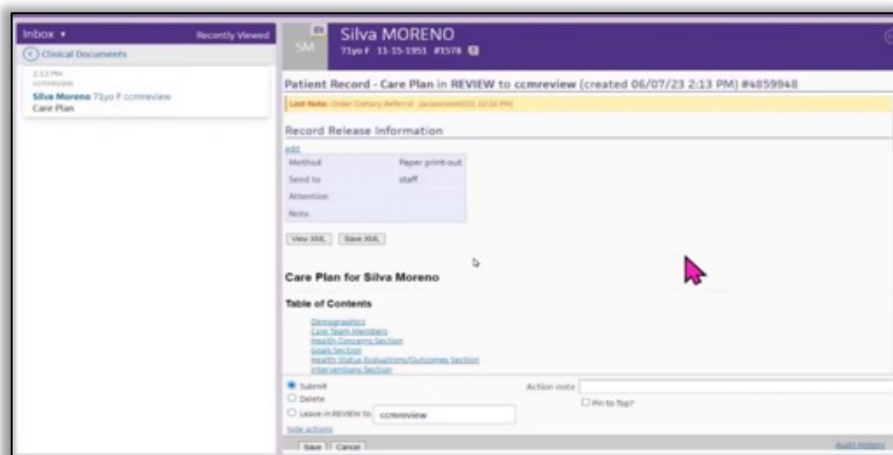

Care Team Member or Provider Completes the Task

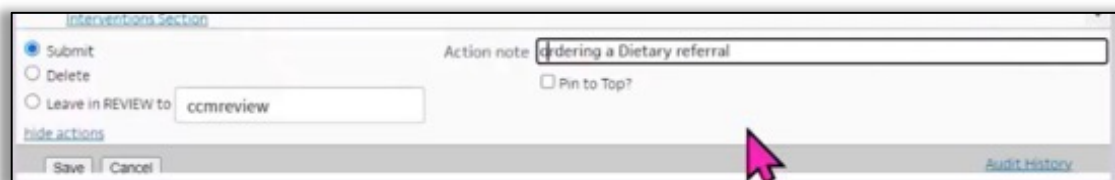

The assigned practice role or staff member can view the Care Plan Document in Review status in their **Clinical Documents Inbox**.

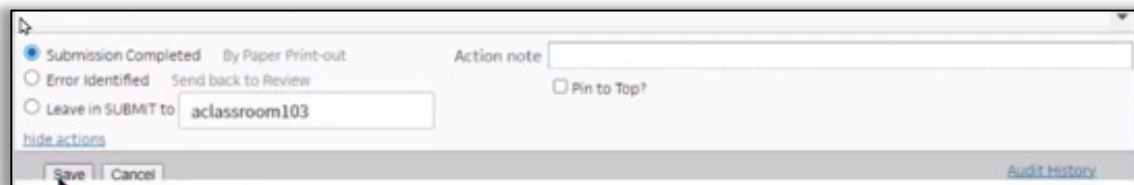

Click on the "Care Plan Document" to display the task needed. The **Action Note** is displayed at the top.

Leave the status as **Submit**, enter a description of the action taken in the **Action Note**, and click "Save" to save the action taken.

Once the task has been completed, close the task and remove it from the Inbox by selecting “Submission Completed” in the **Action Menu**, and clicking “Save”.

Note	

Document Completed Tasks in the Care Plan

Once the Care Team task is complete, the Care Manager will update the Care Plan. Navigate to the **patient's chart** and click on the “Care tab” from the menu. Open the “Care Plan”, scroll down to the **Care Team Task**, and select “Complete”.

Monitor Monthly Time and Activity

Who?

- Care Managers

How Often?

- Monthly

Use the **Care Program Panel** to monitor the amount of time spent each month. If sufficient activity and time have not been met for a month, send a Care Plan Document to the care team as a reminder.

Access the Care Programs Panel from the Patients tab in the **Menu bar**. Filter on the CCM Program and apply other filters as needed. Filter for patients with no time spent and under 20 minutes to identify follow-up needed. Review the total time, last Care Management Event, and Claim status for enrolled patients to manage your program.

Print/Share the Care Plan with the Patient

Who?

- Care Managers

How Often?

- Monthly

Provide the patient with a copy of their Care Plan by using the **Care Plan Letter**.

Open the **patient's Chart** and select "Create Order Group" from the Menu icon. Select the "supervising provider".

Click the "+" icon next to Letters and select "Care Plan Letter".

Select the "patient's name" in the To field and click "Add".

Click "VIEW OR EDIT" to make any changes and add a "Face sheet" to the letter.

In the **Action menu**, select "Approve" and select "Close (to print)" or "Close and email to patient (send to portal)". Then click "Save".

Provider Reviews the Care Plan

Who?

- Care Managers (create)
- Provider (review)

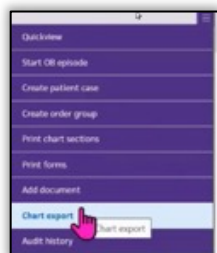

How Often?

- Monthly

The **Care Plan Audit** is created after CCM/PCM care has been completed for the month and displays care provided in the calendar month, including Goals, Progress, and deleted items. Any deleted items appear with a line through the content.

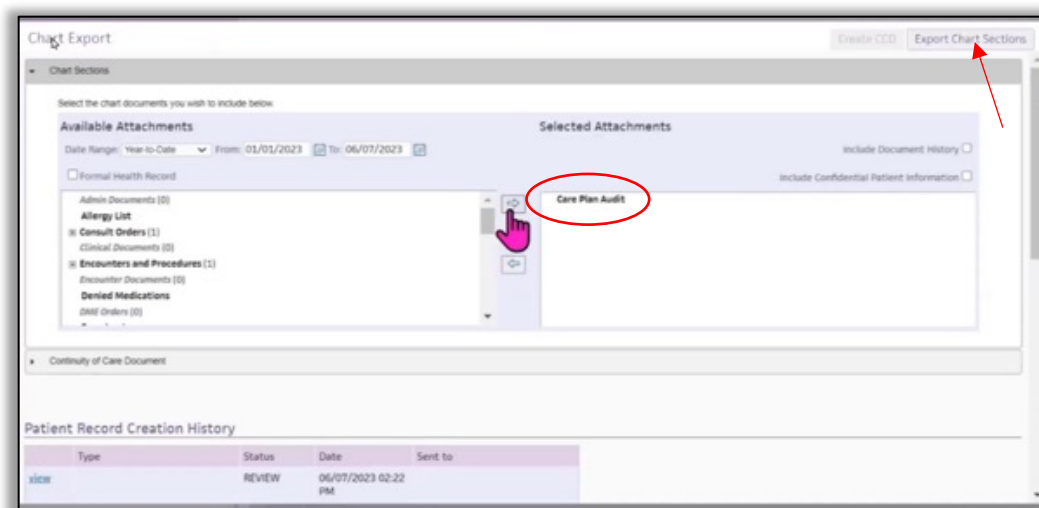

Send the Care Plan Audit to the Supervising Provider

The Care Manager will create and send the Care Plan Audit after the CCM/PCM care has been provided for the month. Go to (**Quickview**> **Clinicals**> **Chart Export**)

In the **Available Attachments** section, select "Care Plan Audit" and use the arrow to move it to the **Selected Attachments** section. A Face sheet can also be included that lists medications, social history, quality tab, etc.

Click on "Export Chart Sections" at the top right to export the **Care Plan Audit** and any other documents selected.

In the **Record Release Information** section, select Method as "Paper print-out" and in the box next to "Send to" type "Chart".

Patient Record in REVIEW to aclassroom103 (created 06/07/2023)

Record Release Information

Click 'Save' at the bottom of the page to regenerate the document.

Method: Paper print-out

Send to: Clear

Attention:

Note:

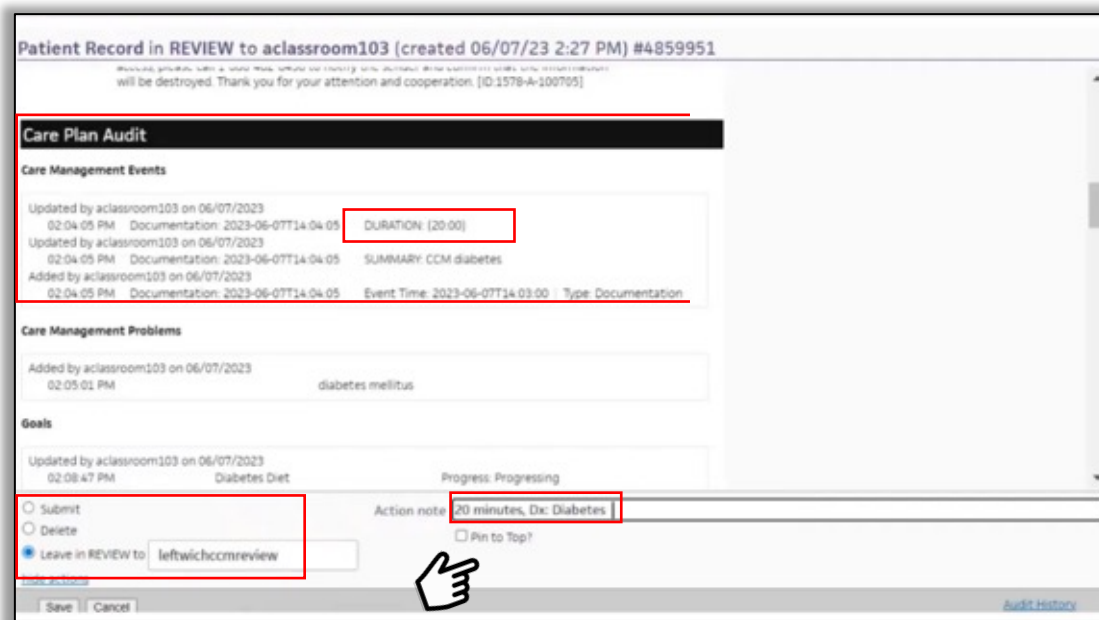

A preview of the **Care Plan Audit** displays, including the Goals and Care Management Events.

Send the **Care Plan Audit** to the Provider by entering the role or provider name in the "Leave in REVIEW" to field.

Enter the "Care Management Problem" and the total "Time Duration" in the **Action note**.

Check the box "Pin to top" so the Provider sees the summary upon opening the document.

Click "Save".

Create the Claim

Every month, submit claims for CCM/PCM services provided that month. Prepare and submit as claims from the CCM/PCM Department (e.g., CCM/PCM Claims).

Review Eligible CCM/PCM Patients

Each month, navigate to the **Care Program Panel** from the **Patients** menu. Identify enrolled patients who have met the time requirement for the month using the Program, Status, Accrued Time by Month and Total Accrued Time fields.

Access the Care Plan from the **Care Program Panel** using the **View Care Plan** link to review the documentation and obtain the diagnosis to use on the claim.

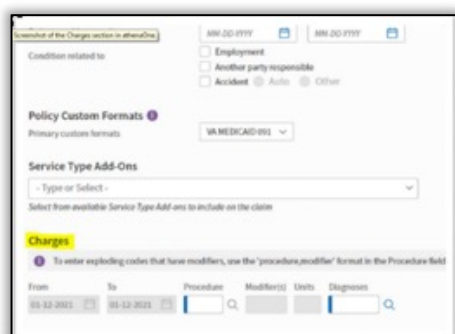

Enter Charges

Click on the "Create a New Claim" link from the **Care Program Panel**. These CCM Claims are created manually since this workflow is outside of an Encounter.

- Complete all the fields above "Charges"
- Confirm all information is documented and accurate to ensure correct coding:
 - DOS
 - Hospitalization Date
 - Service Department
 - Insurance
 - Rendering Provider
 - Supervising Provider

- Enter the "Charges section"

- Review the “Note to Coder” section. Add a note stating the type of service (CCM/PCM) and the date range this billing encompasses
- Click “Send to Coding”

Graduate or Disenroll the Patient

Who?

- Care Managers

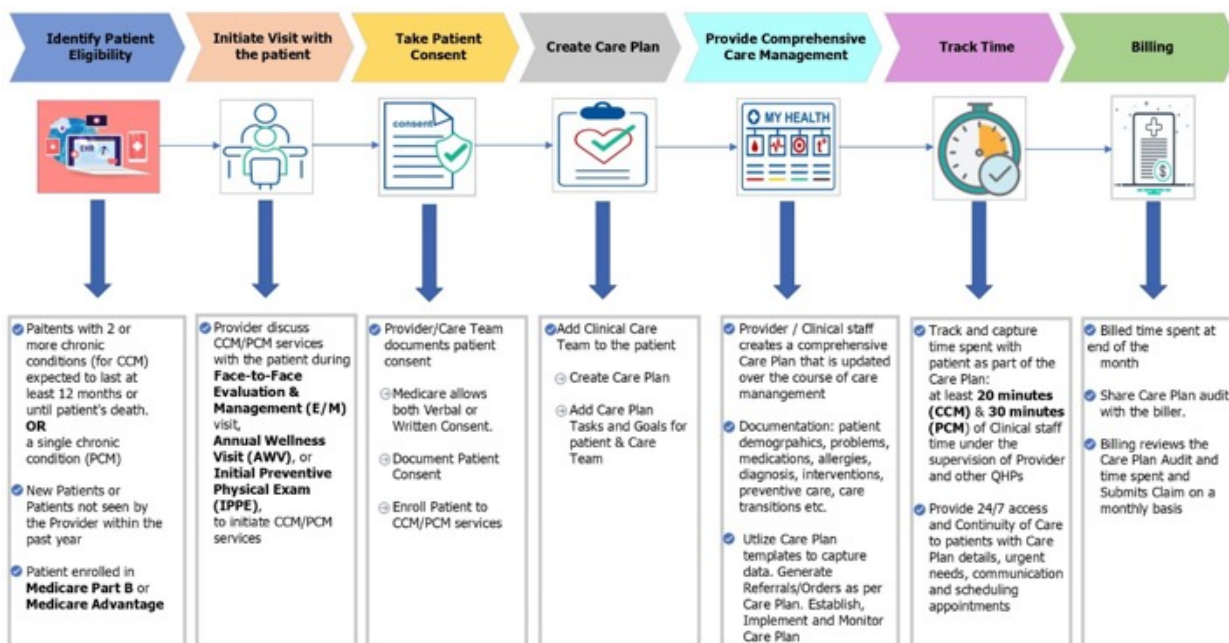

How Often?

- As needed

Go to the **Insurances section** in the patient’s Quickview, click on the “Update status/view history” link in the **Chronic Care Management section**, and select “Unenrolled” from the dropdown menu.

CCM/PCM Workflow

CHRONIC CARE MANAGEMENT / PRINCIPAL CARE MANAGEMENT WORKFLOW

Appendix A - Population Health - CCM/PCM

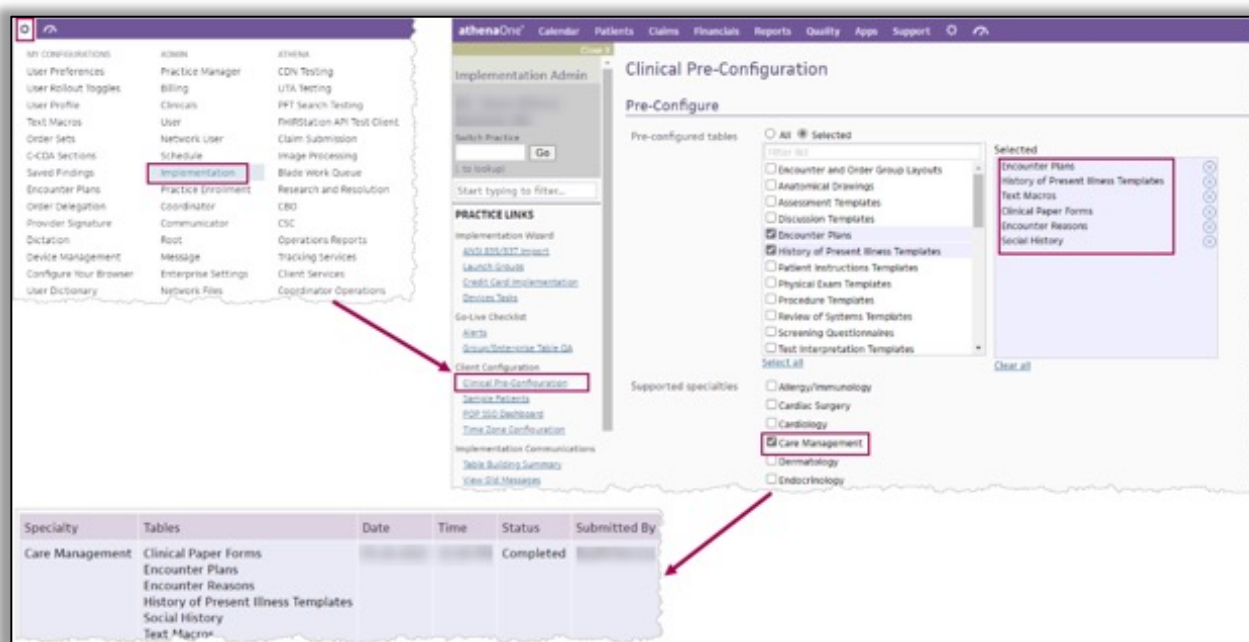

Guide for organizations with the additional **Population Health** product only.

Enable CCM Program – Population Health

Health Centers should reach out to their CSM to enable the CCM Program in Population Health.

To enable the CMS Chronic Care Management program:

1. On the **Main Menu**, click the "Settings icon". Under Admin, click "Implementation".
2. On the left pane, click the "Clinical Pre-Configuration" option under the Client Configuration section to open the Clinical Pre-Configuration page.
3. Include these values against Pre-configured tables by "selecting the respective check boxes": Clinical Paper Forms, Encounter Plans, Encounter Reasons, History of Present Illness Templates, Social History, and Text Macros.
4. Next, select the "Care Management checkbox" against Supported specialties.
5. Click the "Next" button and then click the "Pre-configure tablespace" button to submit your request for pre-configuration.
6. Your request gets listed in the Existing Pre-configurations table with the status as 'Submitted' which then gets updated to 'Completed'.

The screenshot displays the 'Clinical Pre-Configuration' page in the athenaOne system. The left sidebar shows the 'Implementation' menu item selected under 'Admin'. The main content area has a 'Pre-Configure' section with two columns: 'Pre-configured tables' and 'Selected'. The 'Selected' column contains a list of items: Encounter Plans, History of Present Illness Templates, Text Macros, Clinical Paper Forms, Encounter Reasons, and Social History. Below this, the 'Supported specialties' section has a list of specialties, with 'Care Management' checked. At the bottom, a table titled 'Existing Pre-configurations' shows a single entry for 'Care Management' with a status of 'Completed'.

Specialty	Tables	Date	Time	Status	Submitted By
Care Management	Clinical Paper Forms Encounter Plans Encounter Reasons History of Present Illness Templates Social History Text Macros			Completed	

Roles and Permissions for CCM/PCM – Population Health

Health Centers using athenahealth Population Health product must have a user role assigned with permission to access the Population Health features including the care management referrals. These roles and permissions include:

Population Health: 4-stage Care Management Workflow

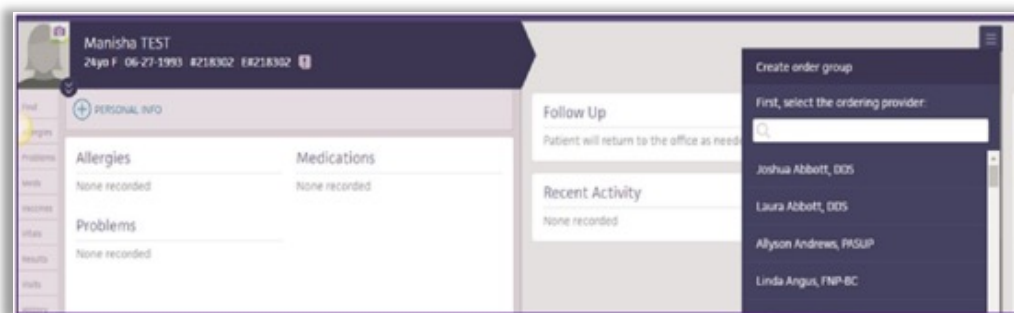

The 4-stage workflow to add patients to the CCM program are:

- Stage 1: Identification:** Analysts can use various reports from the Population Management Report Library to identify patients (such as Severity reports, Financial reports, ED Top Diagnosis, ED Frequent Utilization, Readmit ED detail reports, and Payer Patient list). Additionally, clinical providers (care managers, PCPs, and nurses) identify and refer patients to the CCM programs.
- Stage 2: Enrollment:** Care Managers work with patients and enroll them in CCM programs.
- Stage 3: Goal Setting:** Care Managers and patients work together to create a Care Plan, set goals, list actions, identify barriers, and complete initial assessments.
- Stage 4: Monitoring:** Care Managers and other care team members along with the patient, monitor and track progress on goals and actions.

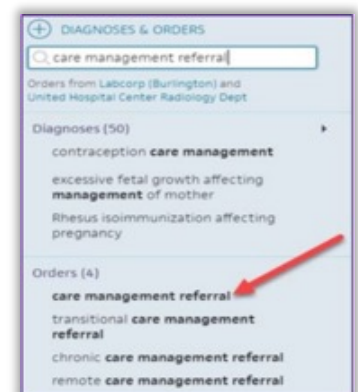

CCM Referral Workflow in athenaClinicals

Placing Referral Order in athenaClinicals:

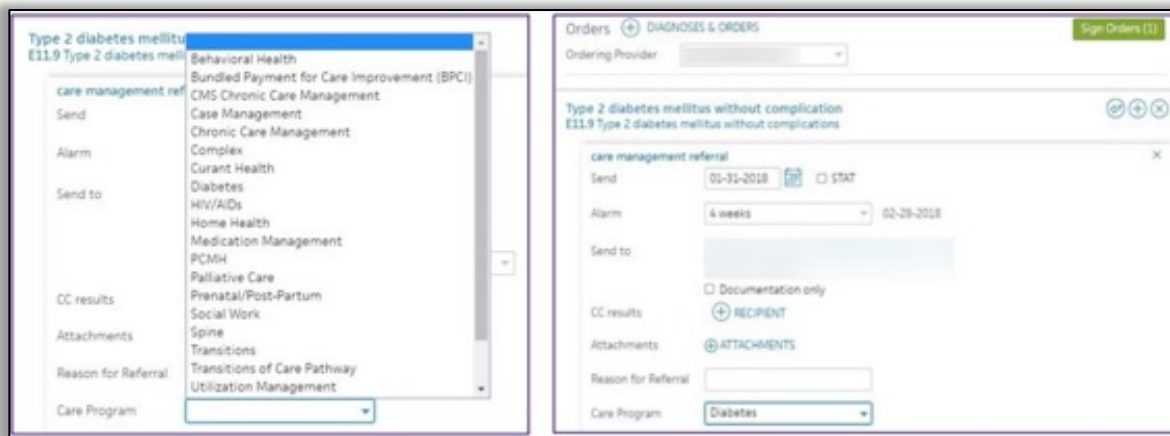

1. Within the **patient's chart**, select "Create Order Group" and then select the "Ordering Provider".

2. Under the **Orders section**, click the "+" icon" next to Diagnoses and Orders.
3. Search for and select "Chronic Care Management Referral".

4. Select a diagnosis to associate with the order
5. Expand the order details, review details:
 - o Send to: Select the “care management receiver” that was set up for your health center.
 - o Reason for Referral: Enter a “reason for the care management referral” (this step is optional).
 - o Care Program: Select the “care program for referring the patient”.
 - If the practice is enrolled for both CCM as well as General Care Referrals (GCR) then the Care Program option “CMS CCM” needs to be selected from the dropdown.
 - If the practice is enrolled only in CCM then the below selection is not required as the system will automatically choose “CMS CCM”.

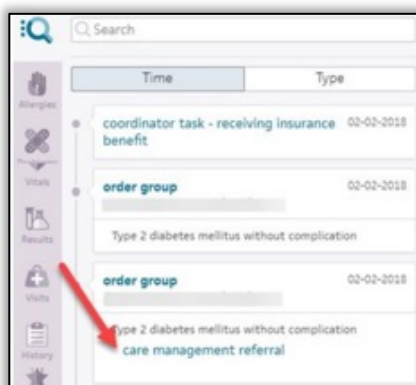

The screenshot shows two parts of the interface. On the left, a dropdown menu for 'care management referral' is open, listing various options including Behavioral Health, Bundled Payment for Care Improvement (BPCI), CMS Chronic Care Management, Case Management, Chronic Care Management, Complex, Curant Health, Diabetes, HIV/AIDS, Home Health, Medication Management, PCMH, Palliative Care, Prenatal/Post-Partum, Social Work, Spine, Transitions, Transitions of Care Pathway, and Utilization Management. On the right, the 'Orders' form is displayed for 'Type 2 diabetes mellitus without complication'. It includes fields for 'Send' (01-31-2018), 'Alarm' (4 weeks), 'Send to' (a dropdown), 'CC results' (Documentation only), 'Attachments' (RECIPIENT), 'Reason for Referral', and 'Care Program' (Diabetes).

6. Click “Sign Orders” to sign orders.

Note: Do not check Documentation Only. This will prevent the referral from being sent to Population Health.

7. After the order is signed, it will appear in the timeline of the patient record.

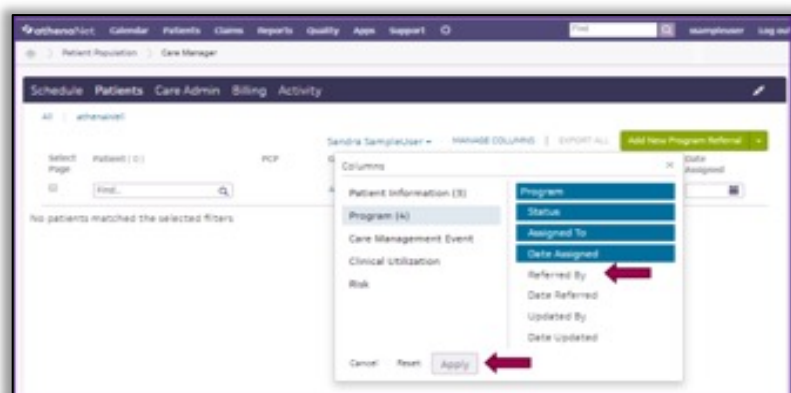

The screenshot shows a patient timeline with a search bar at the top. The timeline lists several events, including 'coordinator task - receiving insurance benefit' and 'order group' entries. A red arrow points to a specific entry in the timeline: 'type 2 diabetes mellitus without complication care management referral'.

8. A referral order is successfully sent to Population Health when:
 - o The order is updated with "Order successfully submitted to Pop Health" AND
 - o The order is placed in a "CLOSED status"

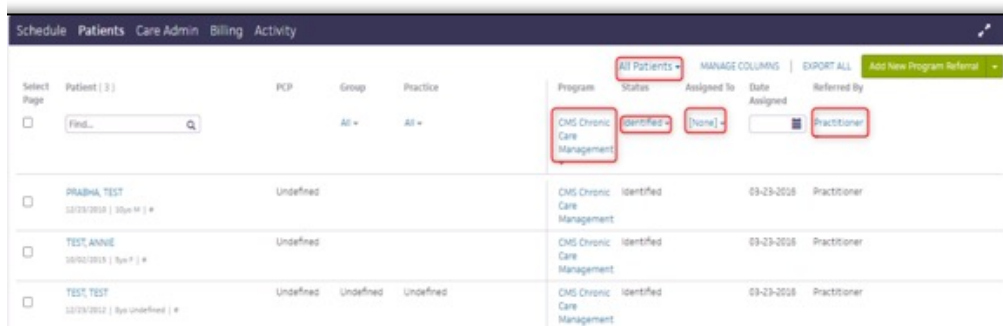

Population Health: Find Referred Patients and Assign a Care Manager to the Referral

When a clinician refers a patient to a care management program in athenaClinicals, the patient appears as Identified on the Patients tab in athenahealth Population Health. These patients do not have an assigned care manager. To Assign Care Manager, follow the below steps:

1. On the **Care Manager page**: On the **Main Menu**, click "Patients" and select "Care Management"
2. Click the "Patients" tab
3. Under **Manage Columns>Programs>**Select "Referred By" and then click "Apply"

4. To display the list of identified patients set up the list with the following filters:
 - o Set the Top filter (next to manage columns) to "ALL"
 - o Set the Program column to "CMS Chronic Care Management"
 - o Set the Status column to "Identified"
 - o Set the Assigned To "None"
 - o Optional: Set Referred By to "Practitioner"

Select	Patient	PCP	Group	Practice	Program	Status	Assigned To	Date Assigned	Referred By
☐	PRABHA, TEST 10/23/2018 10:00 AM #	Undefined	At +	At +	CMS Chronic Care Management	Identified	[None]	09-23-2018	Practitioner
☐	TEST, ANNE 10/23/2018 10:00 AM #	Undefined			CMS Chronic Care Management	Identified		09-23-2018	Practitioner
☐	TEST, TEST 10/23/2018 10:00 AM #	Undefined	Undefined	Undefined	CMS Chronic Care Management	Identified		09-23-2018	Practitioner

5. Click on the "Program name" to update the program referral with the following information:
 - o Update the Assigned To field with "Myself" or "another athenahealth Population Health User".
6. Click "Save"
7. Follow the steps you would take to **Enroll a Patient into Care Management**

Enroll a Patient in a Care Management Program in Population Health

A Care Manager can complete this workflow on the Care Manager Page OR on the patient's Person Center.

On the Care Manager Page

1. Display the Care Manager page: On the **Main Menu**, click "Patients" and select "Care Management".
2. Click "Patients".
3. In the **Actions column**, click "EDIT". The **Edit Program Referral** window appears.
4. Status – Select "Enrolled".
5. Date updated – Enter the "date of enrollment".
6. Status note – Type any notes related to the status update.
7. Click "Save".

On the patient's Person Center

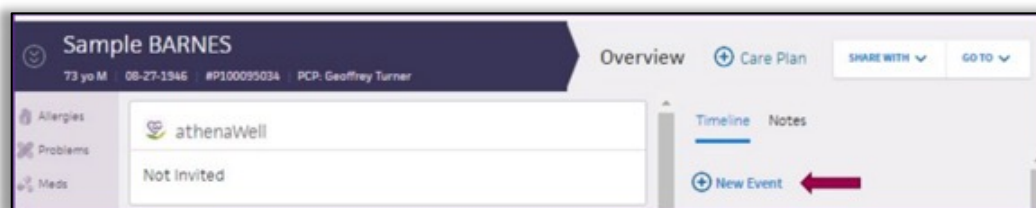

1. Display the patient's **Person Center**: On the Main Menu, enter the "patient's name, patient ID, or member ID (insurance number)" in the Search Bar. Under Network Patients, select the "data type" and then click the "search icon". Matching patients appear under the Patient's tab
2. Click "patient name" to expand the selection, and then click the "patient name in large text" to display the patient's Person Center
3. Click the "Care Management tab"
4. Under **Programs**, click the "name of the care management program". The Edit Program Referral window appears
5. Status – Select "Enrolled"
6. Date updated – Enter the "date of enrollment"
7. Status note – Type any notes related to the status update
8. Click "Save"

Population Health - Document Care Management Services

Care Managers can document care management services by adding and completing events in the event timeline of the patient's **Person Center**.

1. To **schedule an event** within the patient's **Person Center**, click "+New Event" in the event timeline.

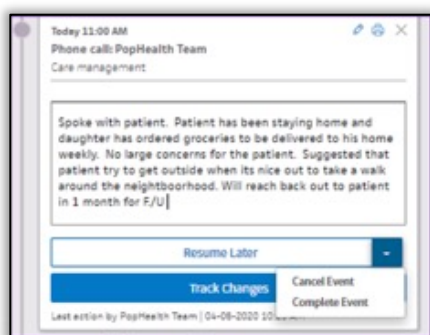

Populate the Event with the following:

- o Event Type: Select the "type of event"
- o Reason(s): Select "one or more reason for the event"
- o Roles: Check the "roles the event applies to"
- o Assign to: Assign the event to a "member of the care team or to yourself"
- o Date: Enter a "date for the event"
- o Time: Enter a "time for the event to begin"
- o Duration: Enter the "duration of the event"
- o Attempt: If you try to contact the patient but are unsuccessful in reaching them, you can select a "description of the attempt from the menu"
- o Click "Schedule" or click "Track Changes"

Note: When selecting a Time in the past, the options change to Complete Event or Track Changes

2. To edit any of the Care Event details, click on the "event in the timeline" and then click on the "Pencil icon".
3. To complete the event, click on the "down arrow" and select "Complete Event".

Note: Marking an event as "Complete" locks the event permanently and prevents further edits. You cannot undo or unlock completed events.

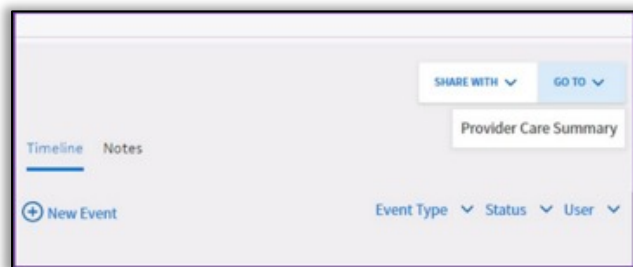

4. Once the event has been completed, use the "Time Spent" field to indicate how long the activity occurred.

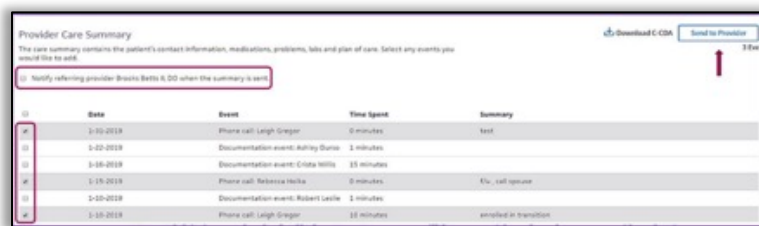

Sending a Summary of Care to Provider

Care Managers can send a care summary to a patient's referring provider if a **Care Management Referral order** was placed within athenaClinicals and the status of the Care Management program is set to **Enrolled**.

1. Follow the steps for **Managing events from the Person Center** (Page 44).
2. In the upper right-hand corner of **Person Center**, select "Go To" and then "Provider Care Summary".

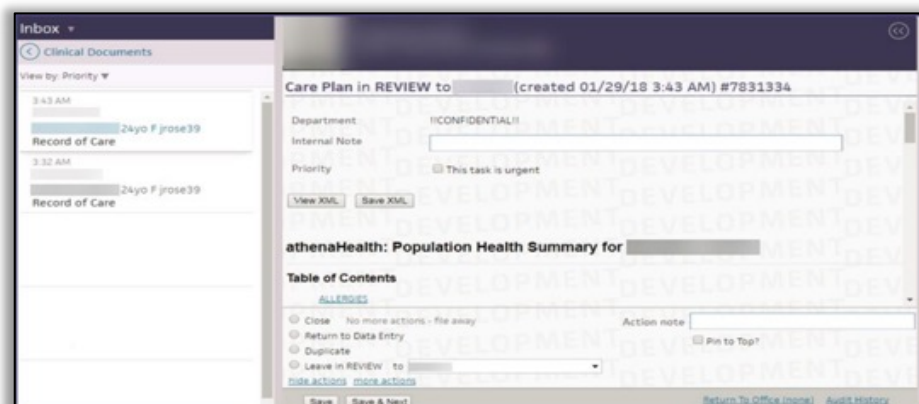

3. "Check off the event(s)" that will be sent back to the athenClinicals chart.
4. To send a Care Summary to the referring provider's clinical inbox, check "Notify referring provider when the summary is sent".

Note: If "Notify referring provider when the summary is sent" is not checked, the Care Summary will be sent with a closed status.

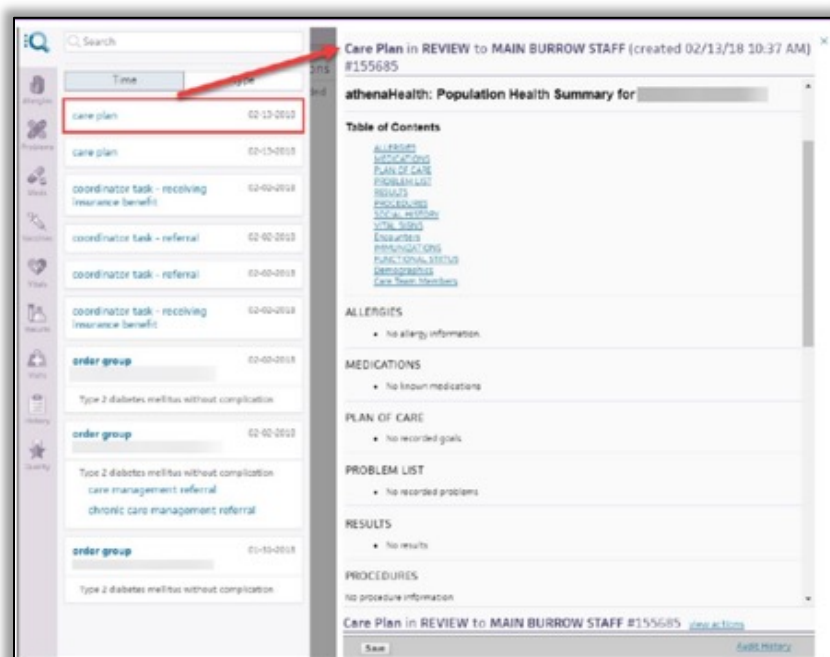

5. Click "Send to Provider".
6. The provider will receive notification of a Care Summary in the Clinical Inbox.

View the Population Health CARE PLAN in athenaClinicals

Each Care Summary sent from Population Health to athenaClinicals, will generate a Care Plan document in the patient's chart. To view this information:

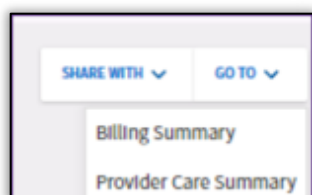

1. Open the **patient chart** in athenaClinicals.
2. Under the search tab (magnifying glass) search for the phrase "Care Plan" or under Type select "Document>Record of Care>Care Plan"
3. Click "Care Plan" to view:
 - o Problems – a list of clinical problems reconciled by the Care Manager based on claims and clinical data
 - o Medications – a list of medications reviewed by the Care Manager based on claims and clinical data
 - o Results – a list of labs reviewed by the Care Manager based on claims and clinical data
 - o Goals – a list of goals set by the Care Manager and patient
 - o Encounter notes – Event notes the Care Manager has elected to include in the Provider Care Summary

Population Health – Generating Billing Report

When the total number of minutes of CCM services rendered reaches 20 minutes in a month, a **Billing Summary** is made available.

1. In the top-right corner of the **Person Center**, select "Go To" and choose "View Billing Summary".

2. If enough time has been documented for the month, a **Create Billing Request** button will appear.

MARCHAND
36-30-1982 RN/A PCP N/A

April 2020
CMS Chronic Care Management : 20 minutes total
Export to Excel

→ Create Billing Request

Date	Event	Referring Provider	Rendering Provider	Time Spent	Summary
4-8-2020	Documentation event		PopHealth Team	15 minutes	Show
4-8-2020	Phone call		PopHealth Team	5 minutes	Hide Contacted patient to discuss enrollment into Health Coaching. Patient agreeable to meeting every 2 weeks by phone. Asked patient if i could spend some time assessing his current state, however patient stated it was not a good time and asked that i call back tomorrow.

Note: If this button says, "Mark as Billed", the referral didn't come from an athenaClinicals order and a claim will not be sent to athenaClinicals

3. Once a billing request has been sent, the button will be replaced with a statement **Billing request sent by User on MM-DD-YYYY.**

To View the CCM Billing Status of Multiple Patients – Population Health

Health centers using the Population Health module can track care management events eligible for CMS Care Management (CCM/PCM) billing and attest to having sent the bill to their third-party billing software using the billing dashboard and summary features.

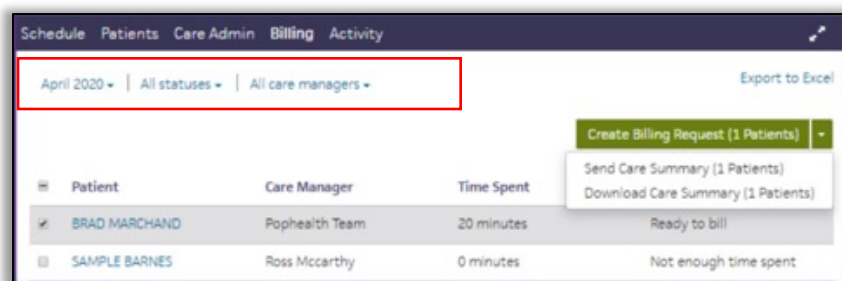

Care Managers can use the CCM billing dashboard to view the billing status of multiple patients at once.

1. On the **Main Menu**, click "Patients" and select "Care Management".
2. Click the "Billing" tab.

Note: The CCM billing dashboard appears listing all patients enrolled in the CMS CCM program for the month.

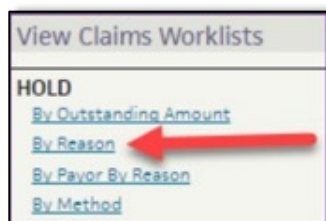

3. You can **filter the Billing dashboard** using the following criteria:
 - o Month/Year: Select a "month and year" to display patients enrolled in CCM for that month.
 - o Status: Select a "CCM status" from the menu to display patients for that CCM status.
 - o Care Manager: Select a "care manager" from the list to display patients assigned to that care manager.
4. Select the "patients" in the filtered list.
5. Click "Create Billing Request" to generate a billing request for CCM services.

athenaCollector – Receive and View Claim

A claim will be automatically created by **API-CCMRECORDOF CARE** and placed in **PRIMARY HOLD status** by a global rule for the procedure code.

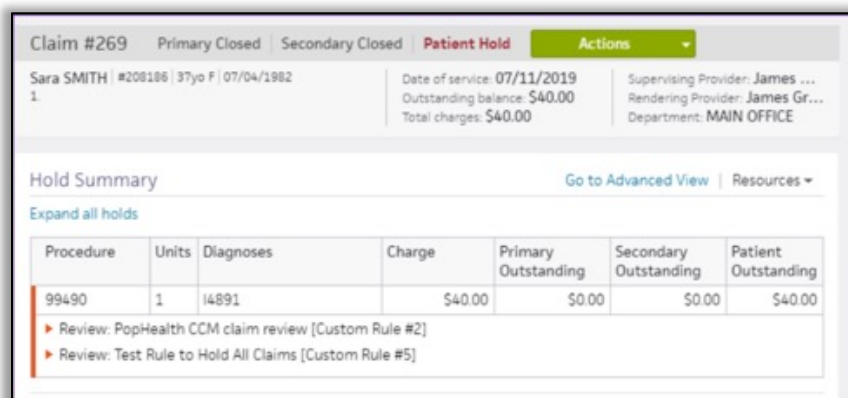

1. On the **Main Menu**, click "Claims" and then click "Claims Worklists". The worklist appears in the Task Bar, with links to worklist categories.
2. **Under HOLD**, click "By Reason" to view the category containing the claims for CCM services.

3. To view the **Claim Action** page, click a "linked item (patient name, dollar amount, or billing slip number)" for the claim.

4. Review the claim information and hold summaries.

▼ Review: PopHealth CCM claim review [Custom Rule #2]
[Default] Procedure 99490 requires coding review.

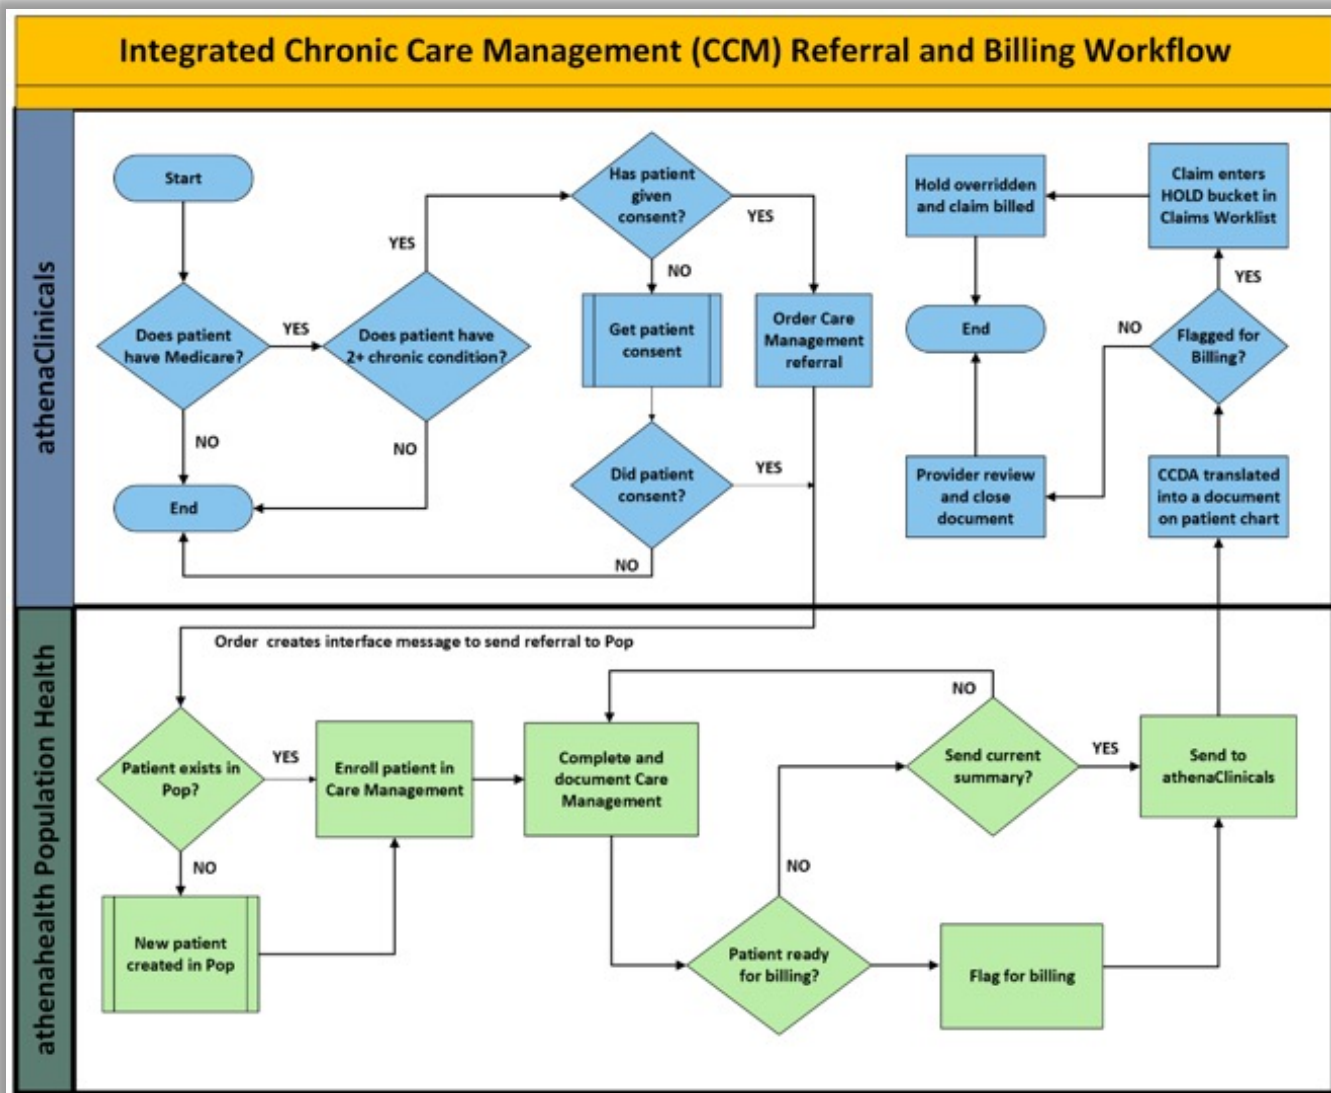

Description: CCM claims that are created with the integrated Clinicals/PopHealth CCM workflow must be held for supervising provider review.

Instructions: Review the CCM claim, cross-referencing with the associated care plan as needed.

Population Health - Integrated Workflow

Health Centers using both athenahealth Population Health and athenaClinicals can refer patients to a Population Health care management program by creating an order in athenaClinicals.

- Care Managers in Population Health can send summary reports of patient care to the referring provider in athenaOne
- Provider can create CCM referrals in athenaClinicals
- The referral will be passed to athenahealth Population Health
- Care Managers can enroll patients and perform care management services.
- Care Managers can send a bill request
- Care Managers can send a summary of care back to the patient's chart
