

Remote VA RN Training Manual: Clinical Operations in athenaOne

1. Practice Overview & Remote Nursing Role

The Remote VA RN serves as a critical clinical coordinator for Prima Medicine, a state-of-the-art primary care practice within the Privia Medical Group. As part of this physician-directed, national multispecialty group, you are responsible for facilitating coordinated, high-quality care across a four-location network.

Locations and Hours of Operation

- **Fairfax:** 3903 Fair Ridge Drive, Suite 218, Fairfax, VA 22033
- Monday – Friday: 8:30 AM – 5:00 PM
- Saturday: 8:00 AM – 12:00 PM
- **South Riding:** 43130 Amberwood Plaza, Suite 130, South Riding, VA 20152
- Monday, Tuesday, Friday: 8:00 AM – 5:00 PM
- Wednesday & Thursday: 8:00 AM – 12:00 PM
- Saturday & Sunday: Closed
- **Merrifield:** 9401 Lee Hwy, Suite 302, Merrifield, VA 22031
- Monday – Friday: 8:30 AM – 4:00 PM
- **Tysons:** 1945 Old Gallows Rd., Suite 405, Vienna, VA 22182
- **OPENING SPRING 2025**

Clinical Leadership

You will operate within a care team led by Medical Director **Chethana Rao, MD**, a recognized top physician in Northern Virginia. Key featured providers include **Joseph Connor, DO** (Family Medicine) and **Jamie Kennedy, PA** (Internal Medicine). Your role is to support these providers by optimizing virtual workflows and maintaining clinical continuity.

2. Module 1: The Virtual Command Center (Clinical Inbox)

The **athenaOne Clinical Inbox** is the primary hub for remote clinical management. Efficiently executing tasks within this interface reduces the administrative burden on the provider and ensures a streamlined encounter.

Notifications and Alerts

Manage the following data streams within the **athenaOne Clinical Inbox**:

- **Lab & Imaging Result Notifications:** Monitor results and prepare them for provider review.
- **Clinical Decision Support:** Respond to real-time alerts regarding drug-to-drug interactions, patient-specific allergies, and other critical safety data.

Standardized Inbox Workflow

1. **Execute Review:** Prioritize notifications surfaced by the **athenaOne** system.

2. **Apply the Rules Engine:** Leverage the **Rules Engine** , which utilizes over 40 million permutations to automatically detect and flag potential claim or clinical issues.
3. **Validate Data:** Correct any missing or inaccurate information flagged by the system to prevent claim denials and care delays.
4. **Finalize Orders:** Verify that electronic orders are "clean" and fully documented before they reach the provider's final signing queue.

3. Module 2: Virtual Chart Prep & Telehealth Workflow

This module outlines the technical execution of the **athenaOne** native telehealth solution.

Pre-encounter Prep

Utilize the **Pre-encounter Prep** feature to complete all clinical documentation tasks and chart reviews prior to the scheduled start time. Your goal is to eliminate distractions for the provider, ensuring the live session focuses entirely on the patient.

Patient Communication and Technical Readiness

1. **Notification Delivery:** Patients access their visits via links sent through text, email, the **Patient Portal** , or the **myPrivia App** .
2. **Virtual Capacity:** Note that **athenaOne** virtual visits support up to four participants simultaneously, allowing for the inclusion of caregivers or interpreters.
3. **The 3-Step Device Check:** Guide patients through the following tests prior to admission:
4. **Speaker Test:** Confirm sound output.
5. **Microphone Test:** Verify the audio bar moves in response to speech.
6. **Camera Test:** Confirm the video feed is visible.

Technical Troubleshooting & Browser Requirements

If technical failures occur, verify the patient is using a supported browser version:

- **iPhone:** Safari v.12 and later or Chrome v.12 and later.
 - **Android:** Chrome, Samsung Internet, or Firefox (latest 3 versions).
 - **Mac/Windows:** Chrome, Firefox, or Safari (v.12+); Edge (v.79+).
- Troubleshooting Steps:**
- **Browser Permissions:** Instruct the patient to **select the lock icon located next to the search bar** to change camera and microphone access to "Allow."
 - **Settings Adjustment:** Verify the volume slider is active and ensure the correct hardware (mic/speaker) is selected in the **athenaOne** settings menu.
 - **Privacy Mode:** Advise the patient to exit "Incognito" or "Private" browsing modes, as these may block session scripts.

Encounter Tools and Visit Completion

During the session, utilize the integrated tools: **Screen Share** , **Chat** (activates after another participant joins), **Show Captions** (multiple languages), and **Reactions** .Once the provider ends the session, the patient will see a notification that the host has ended the meeting. Monitor

the patient's transition to the feedback screen. If they encounter errors, direct them to use the "Report a Technical Issue" link on the final screen.

4. Module 3: Omni-Channel Triage & Patient Engagement

Utilize **athenaOne** digital engagement tools to manage patient traffic and triage needs across multiple channels.

Triage Tools

- **Two-way Text Reminders:** Facilitate patient confirmations, cancellations, or rescheduling.
- **Secure Messaging:** Manage non-urgent clinical inquiries via the **Patient Portal** and **myPrivia App**.
- **Intake Streamlining:** Assist patients with **Enhanced Self Check-in** and **Paperless Online Registration** to ensure all documentation is ready before the call begins.

Telemedicine Consideration Guide

Condition Category, Manageable via Telemedicine, Requires Physical Exam

Chronic Management, "Congestive Heart Disease, IBD, Hypertension, Arthritis, Diabetes", Initial diagnosis or severe acute flares

Viral Infections, "Flu, Common Cold, COVID-19 triage", Respiratory distress or hypoxia

Follow-up Visits, Progress checks for infection or injury, New injuries requiring palpation

Behavioral Health, "Medication management, check-ins", Emergency psychiatric intervention

Administrative, "Medication refills, referrals, lab results", Insurance-required physicals

Preventative, "Diet and Exercise counseling, allergies", "Annual physicals, Pap smears"

5. Module 4: Remote Care Coordination (CCM, Refills, & Referrals)

Chronic Care Management (CCM)

Monitor and coordinate care for patients with high-risk conditions including Diabetes, Hypertension, Arthritis, Congestive Heart Disease, and Irritable Bowel Disease (IBD). Use **athenaOne** to surface care gaps and schedule virtual check-ins for medication management.

Authorization Management Service

For orders requiring medical authorization, **athenaOne** utilizes an integrated **Authorization Management Service**.

- **Workflow:** The system automatically determines if an authorization is required and obtains it on behalf of the practice.
- **RN Role:** Your responsibility is to monitor these tasks within the **Clinical Inbox** to ensure there are no stalled requests and to proactively reduce delays in care.

Referrals and Medication Management

- **Network-to-Connections:** Manage all outgoing referrals and diagnostic orders through the **Network-to-Connections** feature. This ensures electronic delivery to labs and imaging centers nationwide, creating a "clean" audit trail.
- **Refill Monitoring:** Use telemedicine for medication adjustments. If a physical exam is not required, execute the refill through the standard **athenaOne** clinical workflow.

6. Compliance, Security, & Quality Standards

Regulatory Requirements

- **HIPAA & Security:** Adhere to all HIPAA regulations regarding electronic communications. Ensure all patient interactions occur within the secure **athenaOne** or **myPrivia App** environments.
- **Quality Performance Team:** Follow insights provided by the Quality Performance Team to address care gaps and **HCC RAF** coding requirements directly within the clinical workflow.

Encounter Finalization Checklist

Before closing a remote encounter, verify the following:

- Identity and participant relationship (Patient, Caregiver, etc.) confirmed in the visit window.
- **Pre-encounter Prep** and **Enhanced Self Check-in** tasks completed.
- All care gaps surfaced by the **athenaOne** workflow addressed.
- Clean electronic orders submitted via **Network-to-Connections**.
- **Authorization Management Service** status verified for any new orders.
- Encounter ready for final review by AI-supported, certified medical coding specialists.
